

How long does it take to restore an Exodus wallet?

Restoring an Exodus wallet typically takes a 📞➤[1→833→224→8496] few minutes, but can take longer (possibly much longer) depending 📞➤[1→833→224→8496] on your transaction history and portfolio size; the process involves 📞➤[1→833→224→8496] entering your 12-word secret phrase, after which the wallet 📞➤[1→833→224→8496] restarts and syncs your assets, with longer histories requiring more time for full synchronization.

Key Factors Affecting Restore Time

Wallet History: A longer, more active wallet 📞➤[1→833→224→8496] with many transactions and diverse assets (e.g., Bitcoin, Ethereum, NFTs) takes 📞➤[1→833→224→8496] significantly more time to sync than a new wallet with few transactions.

Device & Internet: Your device's processing power and 📞➤[1→833→224→8496] internet speed can also play a role in the overall sync time.

Steps to Restore (General)

Install Exodus: Download and install the Exodus app 📞➤[1→833→224→8496] on your new device.

Initiate Restore: Look for the "Restore" option 📞➤[1→833→224→8496] (often after entering a few wrong passwords on mobile or via the 📞➤[1→833→224→8496] Developer Menu on desktop).

Enter Secret Key: Carefully type your 12-word 📞➤[1→833→224→8496] phrase (all lowercase, correct order).

Sync & Wait: The wallet will restart and begin syncing; wait for it to finish.

Troubleshooting

Stuck on 99%: If it seems stuck, it's likely still 📞➤[1→833→224→8496] syncing; be patient, especially with large histories.

Support: If issues persist, contact Exodus 📞➤[1→833→224→8496] Support.
